This training focuses on OSHA and ANSI B-11 series (American National Standards Institute) standards, with specific safeguarding guidelines for various types of machinery, such as lathes, mills, drill presses, saws, and others.

This half-day course will provide you with a better understanding on how to safeguard your machines to meet safety standards and compliance requirements, and help prevent accidents and injuries.

This training is designed for personnel who work with machinery, who supervise personnel working with machinery, and anyone else who may be interested.

RMS will cover all associated expenses for the course.

If interested, please RSVP to Eric Doland by Friday, January 10th, 2020

Ph: 1-4944 or Email: edoland@nd.edu.
